## CORE BENEFITS<sup>U.S.</sup>

Quality, Compliance & Service

*"We were looking for a technology solution to be the foundation of our ACA compliance strategy. We needed a partner to handle the most difficult parts of the process, adapt based on the evolving regulations, and fit the needs of our business. We found that surviving ACA compliance (and avoiding penalties!) is made easier with the help of SyncStream."*

*"We needed a partner to cover all aspects of reporting that can adapt to health care changes and grow with our company. Once we found SyncStream, we were able to expand our main offerings to include an entire business of ACA consultancy. Now our manual processes are long gone, we can better support unions and schools, and we're ready for whatever turns the ACA might take next."*
